

To the Commission, PLEASE, PLEASE think of the overwhelming ramifications of this momentous decision. During the early to mid '90s I worked for one of the oldest AM/FM combos in the Dakotas, KSDN. At that time there were 3 AM/FM combos owned by 3 different companies (only one locally) with each station having a staff of around 20 people. That is not the case today. Thanks to your lack of insight already, the reduced restrictions on marketshare ownership have given us duplicious programming, eliminated around 40 jobs locally and turned the radio landscape in my community into a wasteland of canned satellite programming and talkshows. Please listen to the American public, the people you represent, about what they are so loudly saying on this matter. Thank you for your time, Kyle Stuchl
